The MAILING DATE of this communication Period for Reply	appears on the cover sheet	with the correspondence ac	ldress				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/10/2010 has been entered.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 15,16,34 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones in view of Buck and Weingarten (2,597,211).

Jones discloses the claimed invention with exception of the buoyant beads, and a cover to secure the zipper handle. Provided are a size variable element which is adjustable to the body size of the wearer, and includes buoyancy elements 19 made of sheets of foam. A first closure element 23 can be used to set the proper size of the element, while a second zipper closure element can be released without altering the first.

Buck teaches the construction of a PFD from buoyant beads instead of sheets of foam.

Weingarten teaches a zipper handle cover.

It would have been obvious to one of ordinary skill in the art at the time of the invention to form the buoyant elements **19** of Jones from beads as taught by Buck.

Such a combination would have been desirable so as to provide for increased flexibility of the garment.

It would further have been obvious to one of ordinary skill in the art at the time of the invention to provide a cover for the zipper handle of Jones as taught by Weingarten.

Such a combination would have been desirable so as to provide for the relief of parting stress at the top of the zip fastener and thereby prevent undesired opening.

4. Claims 15-18,16,21-24,28,29 and 32-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kea in view of Buck and Weingarten.

Kea discloses the claimed invention with exception of buoyant beads and zipper handle cover. Provided are a size variable element which is adjustable to the body size of the wearer, and includes buoyancy elements **32**. A first closure element **17,18** can be used to set the proper size of the element, while a second closure element can be released without altering the first.

Buck is applied as above.

Weingarten is applied as above.

Re claims 17,18,28 and 29, Kea suggests the interchangeability of fastener types, but fails to specifically mention that the lateral straps as including VELCRO®.

Art Unit: 3617

It would have been obvious to the ordinary routineer working in the art at the time of the invention to substitute recognized equivalent fastener types. In this instance, substitution of VELCRO® tape as is old and well known in the art for the lateral strapping of Kea would have been an obvious choice of design.

While there must be some articulated reasoning with some rational underpinning to support the legal conclusion of obviousness, "the analysis need not seek out precise teachings directed to the specific subject matter of the challenged claim, for a court can take account of the inferences and creative steps that a person of ordinary skill in the art would employ." *KSR Int'l. Co. v. Teleflex Inc.*, 127 S.Ct. 1727, 1741, 82 USPQ2d 1385, 1396 (2007).

"When a work is available in one field of endeavor, design incentives and other market forces can prompt variations of it, either in the same field or a different one. If a person of ordinary skill can implement a predictable variation, § 103 likely bars its patentability. For the same reason, if a technique has been used to improve one device, and a person of ordinary skill in the art would recognize that it would improve similar devices in the same way, using the technique is obvious unless its actual application is beyond his or her skill."

Id., at 1740, 82 USPQ2d at 1396. We must ask whether the improvement is more than the predictable use of prior art elements according to their established functions.

Id.

Re claim 18, "towards the back" denotes no specific structure and/or arrangement so as to define over the lateral positioning as shown by Kea.

5. Claims 19-21,30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones in view of Buck and Weingarten as applied against claims 15 and 16 above, and further in view of Samano.

Jones fails to show an adjustment for the arm opening/ shoulder area.

Page 5

Samano teaches such adjustment straps 2.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide adjustability in the shoulders of Jones as taught by Samano.

Such a combination would have been desirable so as to provide for accommodating users of various sizes.

Re claim 20, VELCRO® is a recognized equivalent to the strap fasteners of Samano, and substitution of one for the other would have been well within the level of skill of the ordinary routineer working in the art at the time of the invention, providing results as would be expected.

6. Applicant's arguments filed 9/10/2010 have been fully considered but they are not persuasive.

Applicant's arguments re the securing cover are moot in view of the new grounds of rejection.

Applicant's arguments re the closure means of Jones have been previously addressed in earlier office actions, such as that of 10/21/2009.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 571-272-6688. The examiner can normally be reached on Monday and Wednesday through Friday 6:30 am to 2:00 pm.

Application/Control Number: 10/593,664 Page 6

Art Unit: 3617

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 571-272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
